Eaton’s Waterborne non-yellowing acrylic Cure and Seal 1315 is designed to be spray-applied to freshly-finished concrete to help hydrolysis by holding moisture in the slurry. This eliminates the need for water curing and protects and seals from acids, grease, oils, salt, and more.

**Typical Properties:**

**Appearance:** Dries to Transparent, Glossy, Finish.

**Dry Time:**
- 18 min @ 78° F
- 35 min @ 40° F

**VOC Content:** 340 g/L

**Viscosity (#2 Zahn):** 18-25 Seconds

**Percent Solids:** 25% by Weight

**pH:** 8.5-9.5

**Weight/Gallon:** 8.5 +/- .25 LB.

**Flash Point:** >212° F (ASTM D56-05)

**Yellowing:** .39 @ 300 hrs. (PASS)
