In The Pink
Toilet and Shower Cleaner

A thick clinging phosphoric acid based detergent for cleaning lime deposits and soap film from hard surfaces.

Does not contain any hydrochloric or sulfuric acid. Made of a blend of organic acids that quickly dissolves lime and scale build up.

Because it clings, cleaning vertical surfaces is no longer a problem. Rinses easily and leaves the area with a fresh clean odor.

Applications

- Toilet Bowls
- Sinks
- Tubs
- Tile
- Shower Stalls
- Kitchens
- Bathrooms
- Stainless Steel

Areas of Use

- Schools
- Offices
- Factories
- Nursing Homes
- Hotels/Motels

Physical Properties

Form.....................................................Liquid
Odor..........................................Sassafras
Color...............................................Pink
Clarity..............................................Opaque
Sediment..............................................None
Stability..............................................1 Year Min.
Cold Stability..............Keep From Freezing
Boiling Point...............................212°F
pH..............................................................2.5
Specific Gravity.................................1.08
Pounds/Gallon.................................9.0
Foaming...............................................None
Phosphates..........................................None
Flash Point...........................................N/A
